

#### ABSTRACT OF THE DISCLOSURE

A multi-function processing apparatus, including: an original detection unit that detects a set original; a read  
5 unit that reads an image on the original; an image formation unit that forms an image on a recording medium in toner; a fixing unit that heats the toner image formed on the recording medium; a copy instruction unit that gives a copy operation instruction for causing the read unit to read the image of the set original  
10 and causing the image formation unit to form the image on the recording medium; and a fixing control unit that performs a first control processing for starting to raise a temperature of the fixing unit based on detection of the original by the original detection unit.
